Greetings all,

Thanks again for attending yesterday's webinar on "[*Adapting to Extreme Weather Events*](#)." In this email, you will find the webinar recording link, presentation and the evaluation link. The evaluation link will be open until December 6, 2019 and the certification will be sent out by December 18, 2019.

We will continue to keep you informed about new resources, tools, training events, and webinars for drinking water and wastewater utilities. All webinar registrants will automatically be added to our mailing list. If you would like to opt out, please email us at WSD-Outreach@epa.gov

Present ion slides (attached)

Chris and Emily:

You can find our joint report with the Environmental Integrity Project on Maryland's industrial stormwater program [at this link](#).

And [at this link](#), you will find our report from March of this year about the flood vulnerability of industrial facilities - CWA permittees included - in Virginia's James River watershed.

Thank you,

David

Hi Chris and Emily,

Following up on our May 1 call, in case you didn't catch these names, David Flores at CPR mentioned that the Massachusetts Office of Technical Assistance runs a [Chemical Safety and](#)

[Climate Change Preparedness](#) program and that the contact person there is Tiffany Skogstrom.

David also mentioned that the [New Jersey Work Environment Council](#) does direct technical assistance to industrial operators to prevent flood induced chemical spills.

David - can you forward your VA and MD studies to Chris and Emily?

I'm reaching out to others for more resources/info to share, but that will take a while.

Edan

I agree. Sorry Emily, I thought you were on the email I sent Katelyn. I know Chris is interested in the topic, so I planned to go over some things & discuss the topic more on Wednesday.

I'll cancel the 2p meeting. Enjoy the hr back on your schedule.

Hey Guys

I haven't heard back from Lisa hair and I don't think Jenelle has heard anything tangible back from Chris C. Should we postpone to later in the week so we have something substantive to discuss?

Thank you
Katelyn

Subject: materials

Hi Jenelle,

I just spoke with Cecelia. Here is the link to the materials we developed and additional resources.

<https://njwec.org/p2resources/>

In addition to these materials, we also have worked on reducing chemical releases from industry through New Jersey's Inherently Safer Technology review for facilities covered by the Toxic Catastrophe Prevention Act.

Please let me know if you still want to talk.

Thank,
deb
